Colors printed on this page not exactly match actual panel colors.
Please request panel swatches for true color match.

SUPERIOR QUALITY MEANS GREATER PERFORMANCE.

Varco Pruden uses quality paint systems designed to provide long-term performance and protection. Each coating is formulated with thoroughly researched, tested and field proven pretreatments, primers, resins and pigments that can meet your design and performance requirements.

Varco Pruden offers a variety of paint finish options for self-storage solutions. These options include:

- Siliconized Polyester
- PVDF (Polyvinylidene Fluoride)
- Galvalume® for roof panels only

Trac-Rite Doors are available in 13 durable, pre-finished colors to complement any building. All door panels have a galvanized substrate and are coil-coated with a silicone polyester paint system for long life.

All colors shown on the front have a 30- or 25-year film integrity warranty and a 25- or 20-year color change and chalk warranty from the manufacturer. Further warranty information is available upon request.

Siliconized Polyester paint systems are more economical, yet offer years of performance.

All colors shown approximate paint colors as accurately as possible. Actual paint colors may vary. Colors in this guide are for reference only. Varco Pruden Buildings reserves the right to change color offerings shown here without notice. Painted metal samples are available.

Note: All panels formed from light gauge metal may exhibit waviness, also known as "Oil Canning," commonly occurring in, but not restricted to, flat portions of a panel. This inherent characteristic is not a defect of material and is not cause for rejection.
